

How to Pay a Crypto Invoice

There are various options available for crypto payment, each with varying benefits and Procedure. For this guide, we'll be using a payment service called **BitPay**, and bank transfer as preferred payment method.

There are other payment methods like credit/debit cards. But crypto transactions on credit cards are mostly restricted due to high volatility of digital assets. However, you can try and see if it works for you.

To make crypto invoice payment, please follow these steps below:

1. Visit <https://www.bitpay.com/buy-crypto> and follow the marked instructions as shown below:

The screenshot shows the 'Buy Cryptocurrency' page on BitPay. At the top, there are 'Buy' and 'Sell' buttons. Below them is a form with several sections: 'Amount' with a currency dropdown (labeled A) and a value input (labeled B); 'Buying' with a crypto currency selection dropdown (labeled C); 'Payment Method' with a payment method selection dropdown (labeled D); and a large 'View Offers' button at the bottom (labeled E). Red boxes highlight these specific elements.

View Offers

- A. Select your preferred currency you will use to purchase crypto.

B. Enter the amount you wish to spend for the crypto purchase. The amount you type here should be able to cover the invoice USDT amount equivalent including charges.

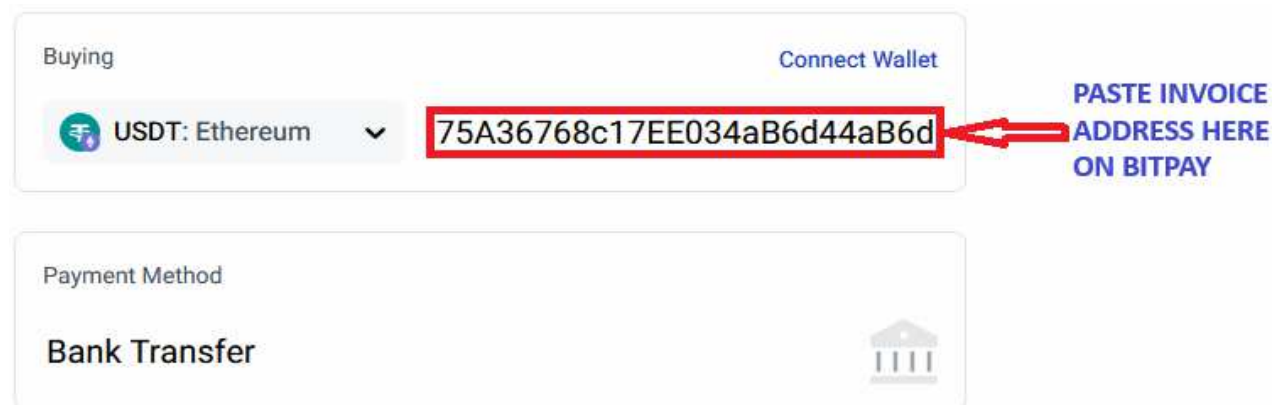

C. Select cryptocurrency type you are buying to pay the crypto invoice (e.g **USDT**). Then Select your preferred Network e.g (**Ethereum** - also known as **[ERC20]**. **Tron** - also known as **[TRC20]**. Or **BSC** - also known as **[BEP20]**).

Note: To avoid any loss of funds, please note that your selected network must correspond with the network of the invoice you are paying. Then click the copy icon on the invoice page to copy the invoice wallet address and paste it in BitPay wallet address column as shown below, this serves as account number:

From Payment Invoice:

To BitPay:

D. Select your preferred payment method. (e.g Bank Transfer, Credit cards, Debit Card or PayPal etc). For this guide, Bank Transfer is preferred.

E. Click on **“View Offers”** to proceed further.

2. Choose the offer that best suits you, and then click on **“Buy”** to continue. In this guide, we'll choose MoonPay offer.

You will notice that the receiving amount has reduced; this is due to transfer charges. Kindly add the difference to your payment amount in order to get the accurate invoice amount. E.g ($\$1,000 - 986.33 = \13.67). Therefore you are required to add **\$13.67** to your payment amount to get 1000 USDT.

The screenshot shows a mobile application interface titled "USDT Offers". At the top, there is a back arrow and the title. Below the title, there are three input fields: "Buying" (set to "USDT: Eth"), "Payment Method" (set to "Bank Transfer"), and "Amount" (set to "\$1,000"). To the right of these fields is an "Update Offers" button. Below the input fields, there are two offer cards. The first card is highlighted with a red border and labeled "Best Offer". It shows "986.33 USDT" and "Ethereum" being provided by "MoonPay". A blue "Buy" button is on the right. The second card shows "946.973321 USDT" and "Ethereum" being provided by "sardine", also with a blue "Buy" button.

Buying	Payment Method	Amount	
USDT: Eth	Bank Transfer	\$1,000	Update Offers

Offer	Provider	Action
Best Offer 986.33 USDT Ethereum	MoonPay	Buy
946.973321 USDT Ethereum	sardine	Buy

3. You are now redirected to <https://buy.moonpay.com>. **MoonPay** is a non-custodial financial technology platform that acts as a fiat-to-crypto gateway, allowing users to buy, sell, and swap cryptocurrencies using traditional payment methods.

Follow the steps according to get registered, verified and complete the payment.

- Enter your email address in the Email column as shown below and click **“Continue”** to proceed.

ENTER SMS CODE HERE

- After verification of phone number and other necessary information depending on your country, MoonPay may request you to upload a valid proof of identification as follows:
 - **International Passport** (photo page)
 - **National ID Card** (both sides)
 - **Driving License** (both sides; or any Government-Issued Identification document).
- If your transaction tier requires address verification, you must provide one of the following documents, which must be dated within the last three months:
 - **Utility Bill** (electricity, water, gas, internet, or landline)
 - **Bank or credit card statement**
 - **Tax invoice**
 - **Mortgage or signed current Lease agreement**

Note: MoonPay may also require you to complete a **3D Liveness Check (live selfie)** using your device's camera to match your face with the ID.

4. Sending payment. Once you have successfully provided all the necessary information and verification completed. MoonPay will display the bank account details and any required payment reference for you to make the payment.

- Send the payment by transfer from your bank:
 - Log in to your online banking app or website.
 - Transfer the exact amount to the bank account provided by MoonPay.
 - Include the reference code exactly as shown.
 - Use a bank account that is in your own name.
 - You can also visit or contact you bank to carryout the transfer.
- Wait for the transfer to arrive.
 - Processing times vary:
 - UK Faster Payments: typically within 24 hours.
 - Europe (SEPA): Takes 1 to 3 business days.
 - ACH transfers (US): typically 3-5 business days.
- Receive your crypto.
 - Once MoonPay receives and verifies the bank transfer, the cryptocurrency is sent to your provided wallet address.
 - You'll receive email updates and can track the order status.

Important tips:

- Always use a bank account registered in your own name.
- Double-check the wallet address before sending payment.
- Make sure the transfer reference is included exactly as instructed.
- Some banks block crypto-related transfers, so do not include any crypto related word while making the transfer/bank deposit. Only use the reference number MoonPay provided for the transaction.
- If a transfer fails, check with your bank first to know the reason for failure.
